

EVM Plus giSTT™

Enhanced Voice Messaging

Read, Listen & Control Voice Messages

VoiceMail to Email, IM and SMS

With EVM Plus giSTT, voice is converted to text. You can read, listen and control enterprise voicemail on any device using email, SMS and instant messaging to improve responsiveness and collaboration in a converging world.

Unify all messages - work, mobile and fax - into email without a desktop client. With Mutare's free EVM Mobile application, consolidate mobile enterprise voicemail in one

place so you never have to log into voicemail again.

Manage your messages with control links right from email and with instant messaging integration, voicemail can be delivered to your IM client. EVM Plus can be installed on a customer provided Windows server or hosted in the Mutare cloud.

All New Enhanced Voice Messaging

- giSTT™ speech to text transcription services offer automated and human assisted service level choices
- Activity Link integration in email allows users to launch a form to append the message and save to a database on the EVM application server

Experience the Benefits of EVM Plus

- Versatility: Works with all email systems and all mobile devices
- Mobility: Play messages from any PC or smartphone

- Simplicity: No desktop software to install or support, ensuring full deployment by end users and less work for IT/Help Desk support
- Productivity: Significantly reduces amount of time spent processing voicemail
- Affordability: Quickly pays for itself in saved time, reduced phone and related port usage
- Accountability: Increased responsiveness means closer workgroup collaboration, better customer relationships
