Voice as a Service (VaaS): What the Technology Villains Leave Out

Why are companies moving to the cloud? What should I consider in managed service options? Are there hidden costs? How do I make sure that I'm not missing something important? What are these companies NOT telling me? Join us to see which factors should be part of a decision to utilize Voice as a Service.

One Avaya IP Office System is sold every 7 minutes! Come See Why!

Avaya IP Office is so popular that one is sold worldwide every 7 minutes! Learn how to blend mobility with BYOD devices so all of your employees are connected!

Hot and Sexy Wireless and Networking: You've been told a bunch of dirty lies. Here's the Truth....

In this presentation, we'll discuss and question the common industry beliefs and requirements to show how to build a better network. We'll discuss differences Avaya can provide in building a network that is more stable, much faster at self-healing, much more secure – and built to last longer than any traditional vendors solutions. Please join us for this insightful and useful discussion.

Power of Place - A Focal Point of the Best Place to do Your Best Work

Power of Place is about knowledge and activity. We will discuss the tensions in today's workplace, collaboration and privacy, engagement, brand and culture, well-being, and optimizing your real estate...this = The Power of Place.

Cloudy with a Chance of Hybrid

Public Cloud, Private Cloud and Colocation can all be spelled "confusing." It's not the technology that's so challenging: it's the dizzying array of choices and options that are available. Solutions diverge greatly, and with a nearly infinite mix of "hybrid" options, how do you determine which – or what combination – is the right solution, and in what contexts? During this session, TierPoint will offer recommendations to help you assess your current situation.

Overcoming the App-Data-Gap with Nimble Storage's Predictive Flash Platform

We all expect instant access to data. Data is essential to businesses, governments, scientists, engineers, developers, and students. Complex infrastructure creates an app-data gap that disrupts data delivery and makes users wait. Join us to learn how the Nimble Storage Predictive Flash Platform delivers data velocity by using InfoSight predictive analytics and a Unified Flash Fabric to close the app-data gap.

Catching the Hacktivist who Wants to Destroy Your Reputation

This sessions provides a base knowledge of cyber crime and why the events continue to occur. We'll introduce strategies to control and mitigate the activity, including case studies involving advanced malware and the varied responses.

I've got 99 Problems, but Ransomware Ain't One

By now, most of us have heard of ransomware or heard stories in the news about businesses being attacked. Ransomware can not only cost a business thousands of dollars a day, but also result in up to a week of downtime. With the increasing sophistication and stealth of malware, it's impossible for 100% protection even through layered security. We want to show you what you need to know to recover and minimize downtime in the wake of such an attack.

Hitting a Home Run on Big Data with an Analytics Bat

Today's contact centers are facing increased competition in the market place, and management is being asked to do more with less. Learn how to harness and transform the business intelligence that is filtering in and out of your contact center every day, into actionable, tangible results.

Spectralink Delivers – Mission Critical Mobile Communications

An overview of how purpose built Wi-Fi mobility solutions address key workflow challenges, and the wide spread adoption of new applications in Healthcare and Retail environments.

You Can't Manage What You Can't Measure

Chronicall is an industry leader for call accounting, call recording and real-time monitoring of users on your phone system. With an easy-to-navigate interface, you'll be able to review or monitor your team's call activity and agent activity any time you want or have reports automatically sent out on a regular basis. Chronicall is easy to use and understand so you can quickly get the information you need to manage your company better and make the best business decision possible with accurate data. After all, you can't manage what you can't measure.

Not Your Grandfather's Nurse Call

Nurse call systems have evolved over the years into an important and useful part of the total patient care experience. With the Affordable Care Act, hospitals today are looking for tools to help them meet the challenges patient safety, communications, regulatory compliance and improve staff efficiencies. West Com has the tools and innovations to help you meet your goals. Join us in STL's Mobile Learning Center to see these tools at work!
