

# giSTT™ Hosted

## Never Listen to Voicemail Again!

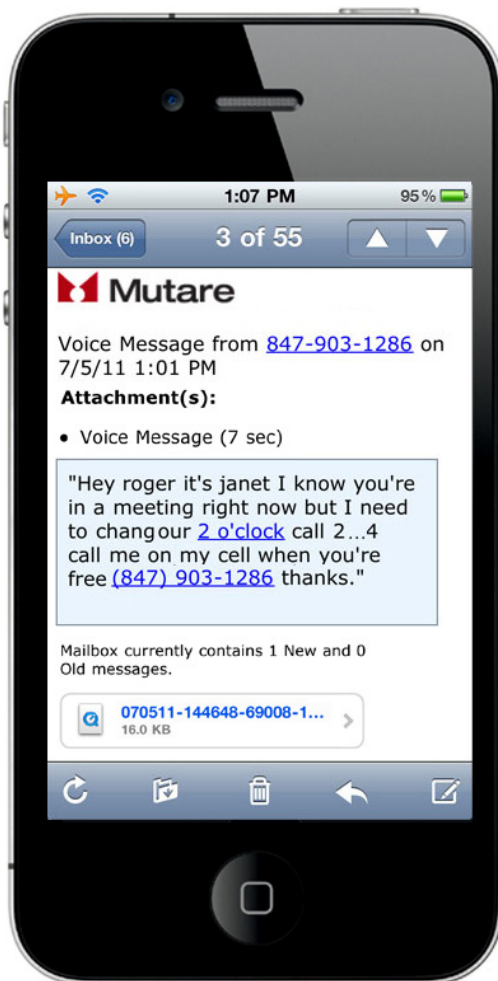

Mutare's giSTT speech to text service delivers voice messages as text to email. Now available for small to medium sized businesses.

“We’ve gotten rave reviews about the new tools that have been provided, especially from our ‘power users’ in the field, who really appreciate speed and efficiency for both their incoming and outgoing communications. Overall I’d estimate that we have increased productivity of our people in the New York area by at least 15%.”

# giSTT Hosted for the Small to Medium Business

## What is giSTT™ Hosted?

Mutare's giSTT Hosted is suitable for small to medium sized businesses and does not require a dedicated on premise server. The user simply sets their voicemail to forward to the giSTT hosted service, and they receive their converted voicemail in email.

## What to Expect

giSTT is designed to deliver a reasonable approximation of the voice message. In most cases, you should be able to act on the message without needing to listen to the audio. You can still listen to the original voice message by clicking on the audio attachment if needed.

## Benefits:

- **Rapid ROI:** Significantly reduces time spent managing voicemail.
- **Flexible:** Works with virtually any email system and any Internet enabled device.
- **Efficient:** Converted messages can be saved, forwarded, or appended just like email. No more jotting down notes and phone numbers!
- **Responsive:** Instant call back with a touch on your Smartphone.
- **ADA Compliance:** Provides hearing-impaired employees with equal access to voicemail.

## About Mutare

Mutare is an independent software developer driven by a passion to make information access easier. Mutare is what unified communications should be – guaranteed. Our unified messaging, mobility, contact center and self-service automation applications provide a common user experience leveraging existing infrastructure while bridging future technologies.

“

**I just wanted to say thanks again for all of your help... I had an opportunity to visit with the City of Grand Junction's IT Director, and he was very impressed with how willing you were to work at helping solve the integration problem as compared to other software vendors. ... I'm impressed that you continue to be so helpful four years later. Your product and service have exceeded our expectations.”**
