

STL Communications is Celebrating 30 years!

For the last 30 years, STL Communications, Inc., has evolved from a telecommunications parts reseller to become one of the top technology organizations in the Midwest. While most people in 1989 were wrestling with Rubik's Cubes and donning Members Only jackets, STL was started at a crowded dining room table.

"I am very proud that STL Communications is celebrating our 30th anniversary! In the ever-changing world of technology our longevity is a testament to the incredible team of people we have employed over those 30 years; both those in the past and our incredible team of current employees," said Steve Leidholdt, President and CEO of STL Communications, Inc.

STL Communications has offered many different products and services through their 30 year history, but today STL Communications is a Business Services Partner (BSP) specializing in voice, networking, storage, desktop and managed service/cloud services.

"I don't think I would change anything about the path we as a company have taken throughout my 22-year tenure" said Greg Bell, Vice President of Operations and Technical Services. "I remember early on talking with Steve Leidholdt (STL's President/CEO) during a tough, transitional time and he told me "Greg, as long as you work at STL you will never be bored." After 22 years, he was right!"

Bell added "From selling refurbished equipment to servicing TDM equipment to the ever-changing world of software we live in today. And through it all, STL has remained true to its commitment to providing outstanding customers service to its customers while still being a fun place to work."

"STL Communications is a special place with a culture that is unmatched in the industry. With Steve Leidholdt at the helm, we are always on the brink of the next big technology, I really do think he has a crystal ball, and in turn we are well prepared. We have 30 years of process behind us and we have seen it all. Our philosophy of diagnosing before we prescribe, sets us apart. Doing it any other way is malpractice," said Al Danklefsen, Vice President of Sales and Marketing.

"We are an Avaya Diamond Partner and are also authorized by HP, Microsoft, Nimble, VMWare, SonicWall, Spectralink, Mutare, Veeam; we are the exclusive West Call nurse call distributor for MO, IL and KS. We offer a unique blend of industry experience (over 800 combined years) and personal attention to service rarely found in today's business climate. Go to STLCOM.COM to learn more about how our team can provide technology solutions backed by our "WOW inspiring" customer service," said Leidholdt.
