

STL Communications, Inc. introduces their newly redesigned Mobile Learning Center!

STL Communications is excited to introduce our newly redesigned Mobile Learning Center! Follow Dr. Data, Professor Voice, Captain Wireless and the newest member of our #STLTechHero team – Super Nurse – on the highway to technical nirvana!

“We understand how busy our customers are, but we also know there is tremendous value in seeing live demos of the technology products and services that we provide,” said Steve Leidholdt, President and CEO of STL Communications, Inc. “The MLC lets us bring that demo to the client’s doorstep so their entire team can be part of the demo experience.”

Companies like Avaya, Spectralink, WestCom, HPE and Microsoft are visible from the outside of the bus, with their expertise and knowledge helping power our demonstrations on the inside of the bus.

The Mobile Learning Center is a moving office, able to provide detailed demonstrations of all our communication solutions. Whether it’s visiting rural critical access hospitals or parked in front of one of our many events, this is a vehicle that is hard to miss. The Mobile Learning Center attends 20-25 events throughout the year, so keep your eyes peeled on the roads for this superhero-studded shuttle.

Interested in having the Mobile Learning Center visit your organization? Contact us at kimkelley@stlcom.com or at (314) 205-7150.
