STLCOM.COM
Technology made easy.

Healthcare organizations realize there are nearly endless possibilities when everything is connected; when people, processes and systems all work together seamlessly. That's the vision of the STL Communications smart hospital. Using technology to make the right connections, hospitals and healthcare organizations can improve: quality of patient care, cost of services, staffing shortages, facility capacity constraints, security and privacy.

TOTAL NURSECALL

EFFECTIVELY COMMUNICATE FOR BETTER PATIENT CARE

- ✔ Increase patient satisfaction
- ✔ Increase staff productivity
- ✔ Integrate with other hospital systems
- ✔ Improve facilities' HCAHPS
- ✔ Reduce doctors' wait time on the phone
- ✔ Improve patients' request response time

Nurse Console
Actionable Alerts and Customized Communication

View patient calls, unit events, equipment and staff location on an interactive map of the unit with a single display that keeps you informed, as well as allow staff members to communicate with patients, set staff member assignments, and send text messages.

- Activate quiet mode to lower noise levels
- Establish Alarm management rules
- Understand current care demands at a glance
- Use configurable call escalation protocols

Unit CareBoard
Patient and Staff satisfaction

Displays dynamic and actionable information to help care providers and unit managers make timely, informed decision to improve patient care.

- Display patient and room status
- Automatically populate unit assignments
- Report compliance concerns
- Identify potential staffing adjustments

Workflow Station
Workflow Improvement and Patient Safety

A powerful communication and collaboration tool used to set care reminders, collaborate with team members and communicate with other services such as EVS, lab, imaging and transportation.

- Support for multidiscipline rounding
- Reduced risk of hospital-acquired conditions
- Set care reminders
- Collaborate with Support Services
