

WIRELESS NETWORK ASSESSMENT

Signal strength can sometimes be easy to predict but critical factors like network health and ever changing, unpredictable channel interference can only be measured by a proper network assessment. STL Communications has invested in the best assessment tools available allowing us to provide the most accurate, meaningful information possible.

MANUFACTURER PREDICTION

Signal Strength for third floor on 2.4 GHz band

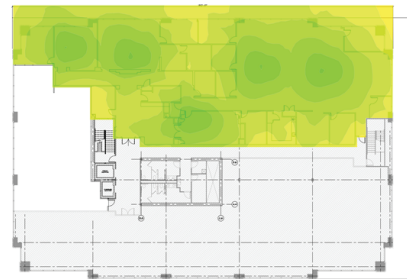

Network Health for third floor on 2.4 GHz band

Channel Interference for third floor on 2.4 GHz band

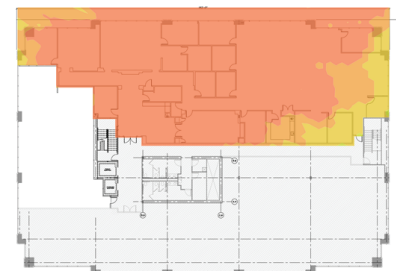

STL'S ACCURATE ASSESSMENT

Signal Strength for third floor on 2.4 GHz band

Network Health for third floor on 2.4 GHz band

Channel Interference for third floor on 2.4 GHz band

SMALL

Up to 5,000 sq ft
\$1,000

MEDIUM

Up to 15,000 sq ft
\$1,500

LARGE

Up to 25,000 sq ft
\$2,500
